An Update on our Hub of Opportunity

As you've probably already heard, we're doing something really big over here at Feeding Tampa Bay. Our new purpose-built facility, set to be completed in 2024, will serve as a Hub of Opportunity: A catalyst for change. We shared the expanded mission of the new facility at our groundbreaking ceremony on January 31, welcoming our community to stand with us in support of a hunger-free Tampa Bay.

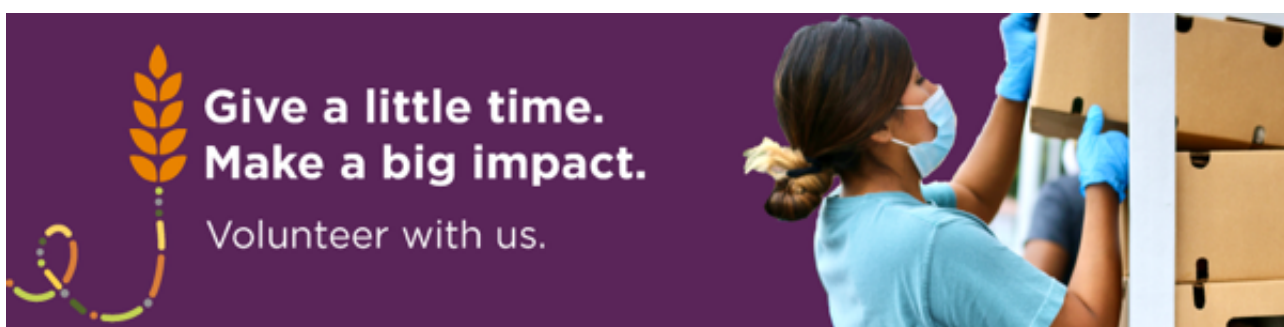

During this phase, we're looking to raise the remaining \$2 million by May 18, 2023, to expand our reach and impact in the Tampa Bay area. These funds will help us to:

- Grow our network of partners, volunteers and donors
- Increase our capacity to serve those in need
- Upgrade infrastructure and facilities to support more efficient operations
- Connect our food partners to local produce and additional grocery products
- Invest in technology to make our services more accessible
- Increase access to nutrition education

This new facility is about more than just providing food to our community. It's about providing a place to gather, support one another, seek knowledge and change the future of those around us for the better. We see a future that includes shorter food lines, better job training opportunities and quicker access to life changing benefits. This Hub of Opportunity will be a place where possibility comes to life, where our volunteers are engaged and empowered, where families can shop in a neighborhood grocery store and where dignity is served daily.

Help us build healthier futures for our neighbors, one building block at a time by joining our fight against hunger.
